

Can we give you a lift?

The recently re-introduced Sprinter shuttle already boasts a modern look and space for up to 16 passengers, or eight with two wheelchairs. Now with bi-fold passenger doors plus a flush-side wheelchair lift, it also saves time by speeding shuttle entry and exit.

The Sprinter just successfully completed the seven year Altoona test and still provides unsurpassed fuel savings and requires less scheduled maintenance – all to help your bottom line.

Sleeker style, reliability, comfortable passengers and operators that save money... **it's time you take a closer look at the Sprinter shuttle from Daimler Buses.**
